

Before we create your production master, we'll need some information from you.

If you would be so kind as to fill this in, and please fill in N/A if it's not applicable, we thank you for your cooperation.

Catalog #

LP Title :

ISRC :

UPC :

Approved Version #

CD Text :

In the United States, ISRC information is available from [www.usisrc.org](http://www.usisrc.org)

International ISRC information is available from [www.ifpi.org](http://www.ifpi.org)

The UPC (bar code) is provided by your replication facility and allows for tracking of your physical & digital album sales.

Some CD players display CD Text data on their LCD screens. The most commonly used fields are the ones we typically input. If you decide to include CD text on your master, please provide us with the Artist, LP and Track Titles.

For recognition of your CD with the Gracenote CDDB, you must submit your CD to the CDDB via a media player on your computer. This info does not get imbedded on your final CD master. For more info visit: <http://www.gracenote.com/about/faqs/#creators>
